

SERVICE

M-Tec® EROTIC Cups by MUEHLMEIER FABRIC MOULDING SERVICE

For Erotic-Lingerie: Cool, Luxurious, Sexy in Tulle net, Satin and Nude Look.

FORM MOULDED LACE AND SATIN – MUEHLMEIER TECHNOLOGY

Erotic lingerie with lace or embroidery and a touch of nothing needs still elegant & smooth support to show fresh & firm “boobs”.

The demand for Perfectly Moulded Cups from delicate fabrics has inspired the Engineers at MUEHLMEIER to develop a unique new moulding process, especially for sensitive materials like lace, embroidery or shining satin.

FORM MOULD HEADS identical to moulded cups, and not just bullet-moulds are the basis of this technology. The process itself is a carefully watched rhythm of heating, cooling, resting and cutting. The moulding is done in single layers for the best material control and final forming. Even storage is done on extra moulded plastic heads to guarantee stable shape.

The highly specialized MUEHLMEIER moulding service enables all producers

of erotic bras, to realize a surprisingly well holding functionality of “Close to nude” breast support.

M-Tec® DEMI CUPS

The flexible use of this “Underbust-Cup” allows the manufacturers of erotic bras to create different variations of sexy, breathtaking bra models but also with functional holding effects.

Combined with light and transparent fabrics as fully fashioned bra or just as a Demi-bra to lift the breast for a generous décolleté.

BODYSHAPING ELEMENTS

To complete the product range of sexy enhancers MUEHLMEIER is offering Silicon-Pushup Inlays or Nipple Covers within its branded retail assortment: Bodyshaping Elements.
